Given the ever-evolving nature of the practice of dental medicine, the General Supervision Program encourages ODQ members to expand and update their knowledge so as to maintain and improve the care provided to the public.

Through this program, the Order, which is governed by the Professional Code, the Dental Act and their regulations, fulfills its mission to protect the public and meets the requirements relating to the supervision of professional practice.

The General Supervision Program, approved by the Order's Board of Directors, includes inspections by dentists. Their mandate is to implement the approaches developed by the Professional Inspection Committee while remaining attentive to members’ needs.

THE PROFESSIONAL INSPECTION COMMITTEE consists of five general dentists in active practice and is responsible for developing the General Supervision Program and reviewing member files. The committee and the Order's Professional Services Department are open to any comments and suggestions you may have regarding the program or your professional file.
